

2023 HIV and Hepatitis Prevention Program Snapshot

Prevention (PrEP) Navigation Services

PrEP Navigation Referrals 2019 - 2023

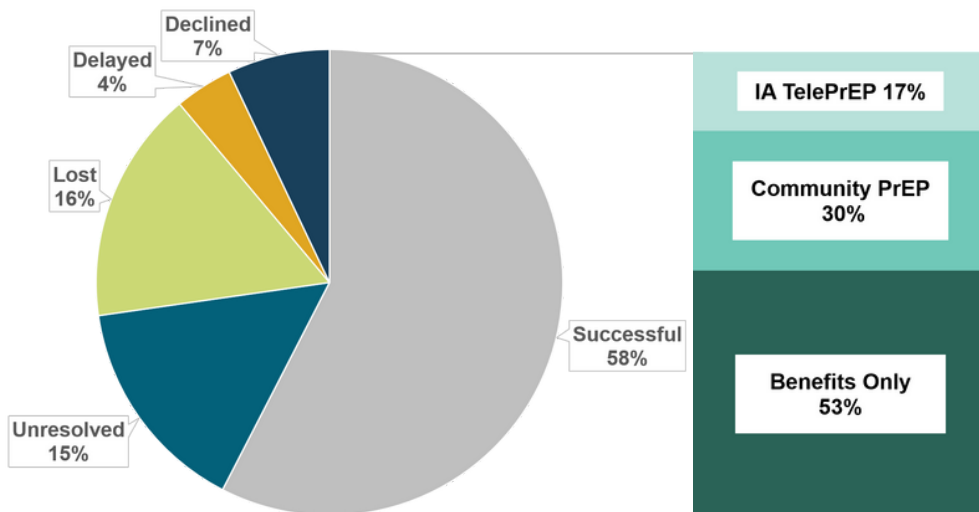

The HIV and Hepatitis Prevention Program provides navigation services to assist individuals through the process of acquiring biomedical HIV prevention interventions (pre and post-exposure prophylaxis).

In partnership with public health service providers and community-based medical providers, individuals interested in pre-exposure prophylaxis (PrEP) are actively referred for navigation services. Services provided range from benefits navigation, patient assistance enrollment, and enrollment with community-based and telehealth PrEP providers.

A total of 513 referrals for PrEP navigation services were received in 2023, an increase of 5.56% from 2022 and above the five-year average of 413 per year.

2023 PrEP Navigation Referral Sources & Outcomes

A total of 513 referrals for PrEP navigation services were received in 2023.

- 79% originated from public health network partners;
- 18% originated from individuals who self-referred for services; and
- 4% originated from community-based medical providers.

The percentages above exceed 100% due to rounding.

Of all individuals referred for support, 58% (293) had a successful navigation outcome as defined by having received or accepted services to assist with engaging or persisting in PrEP care. Of those:

- 53% (155) only required benefits navigation support;
- 30% (89) were linked to community-based PrEP providers; and
- 17% (49) were enrolled in Iowa's TelePrEP program.
